

# **CHAWTON PARISH COUNCIL**

## **Risk Assessment Policy**

Risk assessment is a systematic and careful examination of all activities to identify potential harm. For Chawton Parish Council this would include harm to individuals, to the environment, to assets and to the business of the Council.

The risks arising from the Council's activities will be assessed and documented on an annual basis, and will additionally be reviewed if Chawton Parish Council activities materially change or new activities are undertaken. The assessment will identify the risks, the measures adopted to control such risks and the identity of the individual or individuals responsible for the implementation of control measures.

The Chawton Parish Council Risk Assessment will be published on the Chawton Parish Council website.
